

LESSON 3 Paper Block

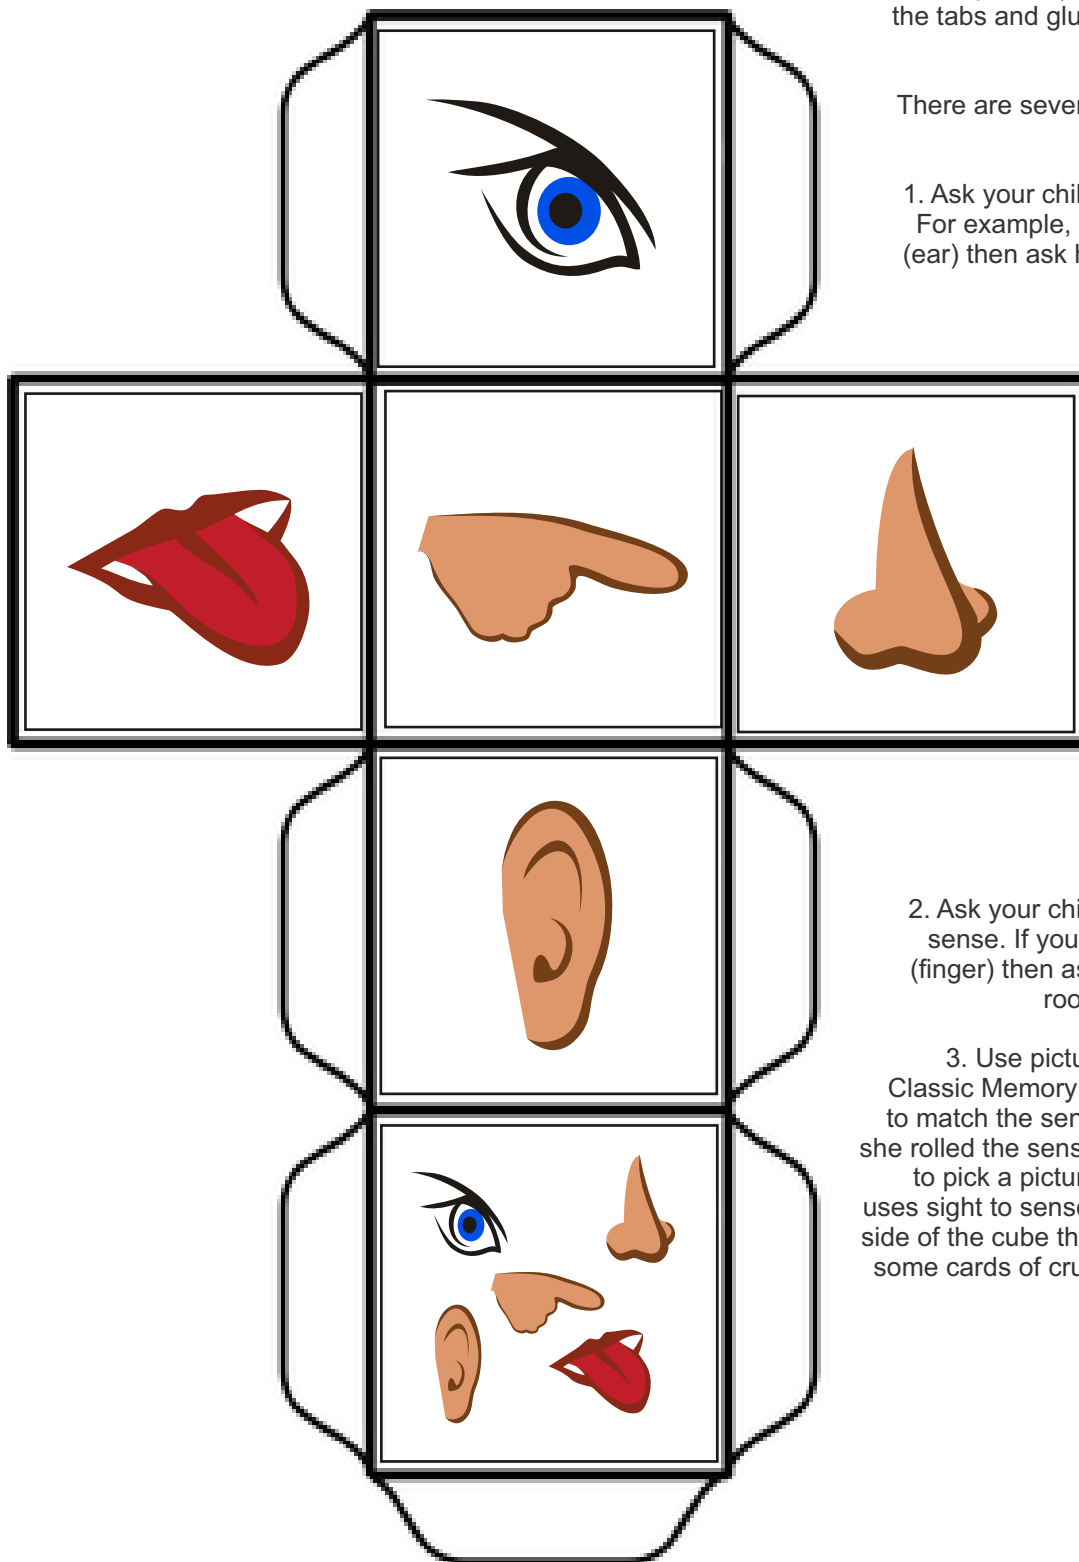

EXTRA ACTIVITY

First, make a five senses cube using a wood block (found at craft stores) and glue on the five senses squares (left). Or you can cut out around the tabs and glue together the fold-able paper cube.

There are several ways to play with the cube. Here are some of our ideas:

1. Ask your child her favorite things to sense. For example, if she rolls the sense of sound (ear) then ask her what her favorite sound is.

2. Ask your child to find things in the room to sense. If your child rolls the sense of touch (finger) then ask her to find something in the room that has an interesting feel.

3. Use picture cards (we used some from Classic Memory). Ask your child to pick a card to match the sense she rolled. For instance, if she rolled the sense of sight, then she should try to pick a picture of an object she exclusively uses sight to sense (clouds, sun, moon). For the side of the cube that shows all five senses, have some cards of crunchy, noisy foods available to choose from.
